## Public Forum on Local Response to Climate Change at SFCC Hosted by Regional Partners: To Be Held at SFCC Hear world acclaimed speaker Søren Hermansen talk about renewable energy initiatives in Denmark and around the world

What:

SFCC, LANL, Sen. Tom Udall, the RDC, the City of Santa Fe and others come together to present a community forum: 'Local Response to Climate Change'. Featuring world-acclaimed speaker and 'Hero of the Environment', Søren Hermansen, the forum will focus on strategies that communities can use to deal with this all-important issue. The event will include an introduction from SFCC President, Dr. Guzman, leading climate researchers from LANL, as well as a recorded speech from Senator Tom Udall. The keynote will be give by Søren Hermansen, to be followed by a panel discussion and Q&A moderated by Santa Fe Mayor, David Coss. The forum is free, and open to all in the community. Light refreshments will be offered.

Who:

**Søren Hermansen** is the director of Samsoe Energy Academy and the head of the Samsoe renewable energy island project. His mission is to demonstrate that it is possible to create a self-sufficient society based 100% on renewable energy. In 2008, Søren Hermansen was named one of the 'Heroes of the Environment' by Time Magazine. In 2009 he was awarded the Gothenborg award – the Nobel prize of the environment. Other Awards include the Energy Globe '08 and Eurosolar '02. He is currently an Adjunct Professor at Aalborg Universitet.

**The Samsoe project** is an effort spearheaded by the Danish government to demonstrate the feasibility of sustainability. Starting in 1997, the island of Samsoe (pop. 4,100) managed to cut its carbon footprint by %140 through community involvement, and today exports wind-power to the European mainland. The island's success as a model for the energy revolution draws thousands of visitors and tourists from around the world, eager to learn how this was accomplished.

**When:** 3:00-5:00 p.m. on Tuesday, October 8, 2013

Where: The SFCC Board Room
